Shaping California Together

Since 1887, Skanska has used knowledge and foresight to shape the way people live, work and connect. We have been shaping California since 2002 and have grown our team to over 100 builders.

Embedded in our culture at Skanska is the belief that Inclusion and Diversity within our project teams makes us stronger, more creative and better builders for our clients. Providing a real opportunity to diverse businesses as members of our project teams strengthens our community. Our Diverse Business Participation plan is not about awarding contracts to a specified percentage of firms; it is about providing meaningful opportunities through outreach, mentorship, education and training – to support each firm in achieving success.

Excellence in Construction Leadership Program

Skanska launched its Excellence in Construction Leadership Program in 2024. ECLP is a nomination-based, executive-level program that brings Skanska's leadership team members together with executives from the diverse businesses in our communities. The open-ended program is designed to facilitate ongoing access, knowledge-sharing and mutually beneficial relationships between Skanska and our diverse business partners—particularly those who have the potential to strengthen our strategic connections with customers and community stakeholders. Visit for more information [Subcontractor Engagement at Skanska](#).
